real agriculture

# Challenges

# Water

- \* Number one challenge
- \* Is California a vision of the future?
- \* Increasing production and environment

# Isolation Management

- \* Integral to certain crop types
- \* Farmers are free to plant what they want
- \* increased trait development = increased isolation challenges

# Disease Pressure

- \* disease is the enemy of seed production
- \* intensity brings disease
- \* fusarium

# Opportunities

# It Just Makes Sense

- \* manage seeding rates
- \* manage fertility
- \* manage water supply
- \* manage disease
- \* manage harvest

# Certified seeds is on the Rise

- \* gateway to the future
- \* closed loop systems (retail)
- \* more traits being developed

# Technology Development

- \* sprinkler efficiency
- \* remote pivot management
- \* water conservation
- \* biotech crops and trait stacking

# Thank-you
